## **AI Employees** to boost sales in **clothing, cosmetics, and jewelry stores**

**AIOROS** offers its clients a pre-trained Artificial Intelligence model, which we call the AI Employee.

Clients can keep their data in their own cloud or local server.

**Client:**
Clothing and footwear boutiques, etc.

**AI Employee:**
Alpha Node

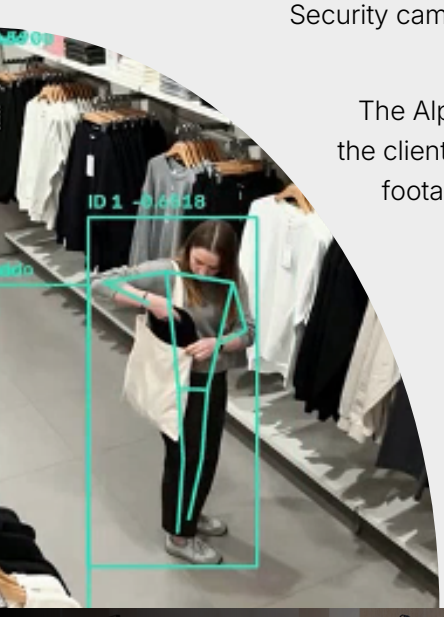

**Employee Role:**
Consumer Behavior and Security

**AIOROS** offers an AI Employee that works alongside salespeople and managers of clothing, footwear, and handbag stores to analyze customer behavior and detect potential security threats.

Security camera footage is stored in the client's cloud or local server.

The Alpha Node AI Employee connects to the client's cloud or server to analyze video footage and perform inference when an event occurs.

*The AI Employee also undergoes monthly retraining with the assistance of our engineers.*

### Business Example:
Clothing Boutiques and Stores

**Alerts**
Notifies the sales manager or store owner when a customer may need assistance purchasing a high-value product or when a theft risk is detected.

**Predictions**
Which high-value products should be promoted and stocked in greater quantities.

**Reports**
On high-value product displays and their proper placement within the store.

**More sales and safer stores for your business.**

**+10% minimum**
increase in sales.

**24/7**
Continuous store monitoring.

# How It Works

**1. Client's Cameras**
The store's cameras record video footage.

**2. Client's Cloud or Local Server**
Video footage is stored in the client's cloud or local server.

**3. Alpha Nodes**
Analyze video footage and undergo monthly retraining with our engineers.

# Retail Applications

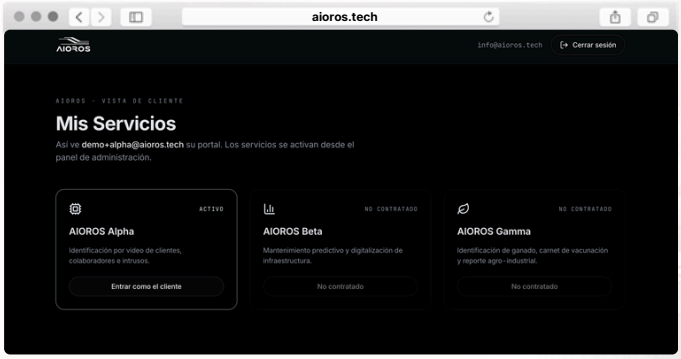

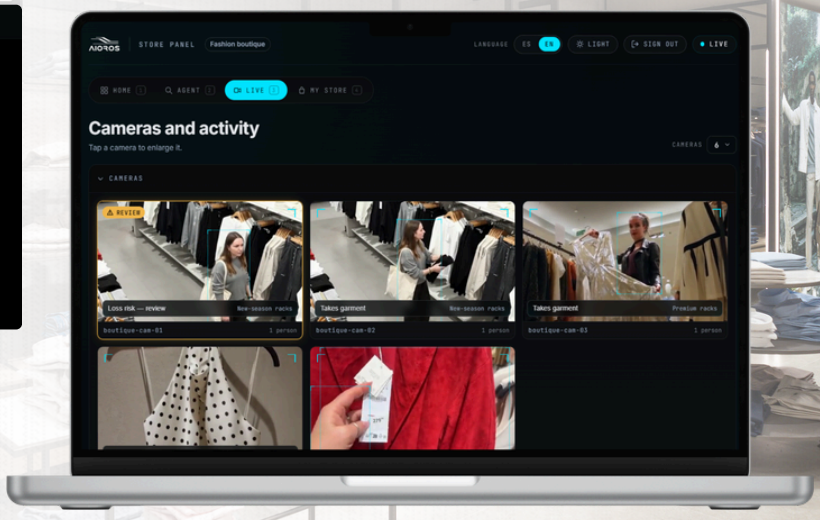

# AIOROS Web Dashboard

Each client can view both the raw data collected and the analysis provided by the AIOROS AI Employee through a web dashboard, accessible with their user account.

**Camera analysis and AI Employee inferences.**
